

## My Data Entry : Daily Precipitation Report Form

### Reporting Snow and Sleet

The depth of snow and/or sleet that fell in the past 24 hours measured on your snow board or flat, level surface is entered here.

This is the water measured from a core of snow taken from your snow board. If you do not take a separate core leave this NA. Do not copy your precip into this field.

This the depth of snow and ice on the ground each day, whether or not any snow has fallen.

This is for the SWE of total on the ground, old plus new snow and ice.

### Precipitation Report Form

[Submit Data](#)[Reset](#)

Station Number : IL-CP-1

Station Name : Homer 2.0 N

\* Denotes Required Field

12/1/2015

\* Observation Date ?

7:00 AM

\* Observation Time ?

0.23 in.

\* Rain and Melted Snow to the gauge during the past 24 hours

Melt the frozen precip in the gauge and report it here. If you cannot melt or do not have a measurement, change to NA. Do not leave it as zero. Do not enter your snowfall here.

Observation Notes: (This will be available to the public) ?

Very little wind - good gauge catch.

Comments are always helpful.

#### New Snowfall

2.6 in.

Accumulation of new snow in inches to the nearest **tenth** ?

0.25 in.

Melted value from core to the nearest **hundredth** ?

#### Total Snow and Ice on Ground at Observation Time

2.5 in.

Depth of total snow and ice (new and old) in inches to the nearest **half inch** ?

NA in.

Melted value from core to the nearest **hundredth** ?

#### Duration Information

a time is unknown or the storm has not ended leave
